INDEX TO AUTHORS

AMIES, C. R., the envelope substance of *Pasteurella pestis*, 259

ANDREWES, C. H., see *Gledhill, A. W.*

BACON, G. A., BURROWS, T. W., and YATES, MAGARET, the effects of biochemical mutation on the virulence of *Bacterium typhosum*: the loss of virulence of certain mutants, 85

BANGHAM, A. D., the effect of cortisone on wound healing, 77

BARR, MOLLIE, and LLEWELLYN-JONES, MONA, factors influencing the development of potential immunity and the character of the secondary response, 231

BARWELL, C. F., see *Monsur, K. A.*

BAUER, D. J., nucleic acid metabolism in virus infections, 7

BAXI, A. J., see *Talageri, V. R.*

BELYAVIN, G., see *Smith, Wilson.*

BOORMAN, KATHLEEN E., DODD, BARBARA E., and JOHNSTONE, AVRIL, a family showing the existence of the Rh gene complex CD^uE, 49

BOURNE, GEOFFREY H., some histological aspects of formalin "arthritis" in rats, 377

BOWEN, T. J., an electrophoretic estimation of the correlation between the cholesterol content and the material extractable from β-globulin in normal and diabetic sera, 70

BOYD, J. S. K., and BRADLEY, P. L., on the assessment of the influence of chemical compounds on bacteriophage multiplication, 397

BOZZO, A., the use of *V. cholerae* filtrates in the destruction of non-specific inhibitor in ferret sera, 325

BRADLEY, P. L., see *Boyd, J. S. K.*

BURROWS, T. W., see *Bacon, G. A.*

CAIRNS, H. J. F., the growth of influenza viruses and Newcastle disease virus in mouse brain, 110

CASPARY, E. A., see *Pope, C. G.*

CHENG, KWOK-KEW, a technique for total hepatectomy in the rat and its effect on toxicity of octamethyl pyrophosphoramide, 444

COOK, G. T., KNOX, R., and TOMLINSON, A. H., production of fermentative variants by *Shigella sonnei* and other "late fermenting" organisms, 203

COOMBS, R. R. A., GLEESON-WHITE, M. H., and HALL, J. G., factors influencing the agglutinability of red cells. II: The agglutination of bovine red cells previously classified as "inagglutinable" by the building up of an "anti-globulin: globulin lattice" on the sensitized cells, 195

CROWE, M. O'L., and WALKER, A., coproporphyrin III isolated from the human tubercle bacillus by chromatographic and fluorescence analysis. Fluorescence and absorption spectral data, 1

CZEKALOWSKI, J. W., see *Dolby, D. E.*

DAFAALIA, E. N., and SOLTYS, M. S., studies on agglutination of red cells by *Clostridia*. I. *Cl. septique*, 510

DAVIDSON, W. M. B., the development of thymic bodies in rats after fat injection, 448

DODD, BARBARA E., see *Boorman, Kathleen E.*

DOLBY, D. E., and CZEKALOWSKI, J. W., studies on the reproduction of bacterial viruses. I. Some observations on the adsorption and multiplication of coliphages, 498

EBBELS, L., see *Fantl, P.*

FANTL, P., EBBELS, L., and NELSON, J. F., the presence of thiol groups in thrombocytes and their significance in the contraction of fibrin gel, 538

FENTON, E. L., see *Pope, C. G.*

FINDLAY, G. M., and HOWARD, E. M., the susceptibility of rats to encephalomyocarditis viruses, 569

FLOREY, H. W., see *Markham, N. P.*

——— see *Sanders, A. G.*

FRASER, K. B., antibody to purified virus inhibitor, 552

GELL, P. G. H., and HINDE, ISOBEL T., the histology of the tuberculin reaction and its modification by cortisone, 516

GLEDHILL, A. W., and ANDREWES, C. H., a hepatitis virus of mice, 559
GLEESON-WHITE, M. H., see *Coombs, R. R. A.*
GORDON, J., the action of ammonia on complement in the inactive phase associated with high concentrations of sodium chloride, 442
GORRILL, R. H., experimental staphylococcal infections in mice, 151
GOTTSCHALK, A., and PERRY, BEVERLEY, T., ovomucin: a substrate for the enzyme of the influenza virus. III. Enzymic activity as an integral function of the influenza virus particle, 408
——— see *St. Groth, S. Fazekas de.*
GREEN, H. N., see *Stoner, H. B.*

HALE, J. H., studies on staphylococcus mutation: a naturally occurring "G" gonidial variant and its carbon dioxide requirements, 307
HALL, J. G., see *Coombs, R. R. A.*
HEATLEY, N. G., see *Markham, N. P.*
HINDE, ISOBEL T., see *Gell, P. G. H.*
HOCH, H., see *Marrack, J. R.*
HOLLAND, WILLIAM C., immunological studies on a highly purified cholinesterase, 382
HOLT, L. B., quantitative studies in diphtheria prophylaxis: some observations on the correlation in identified guinea-pigs between their responses to more than one inoculation of diphtheria prophylactic, 157
HOWARD, E. M., see *Findlay, G. M.*
HUGHES, D. E., a press for disrupting bacteria and other micro-organisms, 97
HUMPHREY, J. H., the effect of cortisone upon some experimental hypersensitivity reactions, 274

ISAACS, ALICK, and BOZZO, A., the use of *V. cholerae* filtrates in the destruction of non-specific inhibitor in ferret sera, 325

JOHNS, R. G. S., see *Marrack, J. R.*
JOHNSTONE, AVRIL, see *Boorman, Kathleen E.*

KENT, J., see *Markham, N. P.*
KNOX, W. E., two mechanisms which increase *in vivo* the liver tryptophan peroxidase activity: specific enzyme adaptation and stimulation of the pituitary-adrenal system, 462
——— see *Cook, G. T.*

LINDAN, O., pregnancy as a precipitating factor in dietetic liver necrosis in rats, 471
LINDER, G. C., see *Selzer, G.*
LLEWELLYN-JONES, MONA, see *Barr, Mollie.*
MCKENZIE, D., see *Selzer, G.*
MARKHAM, N. P., FLOREY, H. W., the effect on experimental tuberculosis of the intravenous injection of insoluble substances: experiments with carbon, 25
———, HEATLEY, N. G., SANDERS, A. G., and FLOREY, H. W., the behaviour *in vivo* of particulate micrococcin, 136
———, WELLS, A. Q., HEATLEY, N. G., and FLOREY, H. W., the effect on experimental tuberculosis of the intravenous injection of micrococcin, 353
———, and KENT, J., a technique for the repeated intravenous injection of guinea-pigs, 366
MARRACK, J. R., HOCH, H., and JOHNS, R. G. S., the valency of antibodies, 212
MAYER-GROSS, W., see *Walker, J. W.*
MILES, J. A. R., observations on the course of infection with certain natural bacterial pathogens of the rat in rats on protein-deficient diets, 285
——— effects of low protein diet on the multiplication and disappearance of louping ill virus in the rat, 295
MONSUR, K. A., and BARWELL, C. F., observations on the antigenic relationship between the virus of enzootic abortion in ewes and viruses of the psittacosis-lymphogranuloma group, 414
MORGAN, R. S., see *Wright, E. A.*
MORGAN, W. T. J., and WATKINS, WINIFRED M., the inactivation of the blood group receptors on the human erythrocyte surface by the periodate ion, 34

NELSON, J. F., see *Fantl, P.*

O'CONNOR, R. J., respiration and cell division in the red blood cells of the chicken embryo, 336
——— the action of acridine compounds on cell division, 547
OLESON, J. J., see *Woll, E.*

PARKER, R. G. F., see *Selzer, G.*
PERRET, C. J., see *Pollock, M. R.*
PERRY, BEVERLEY, T., see *Gottschalk, A.*
POLLOCK, M. R., and PERRET, C. J., the relation between fixation of penicillin sulphur and penicillinase adaptation in *B. cereus*, 387
POPE, C. G., STEVENS, MURIEL F., CASPARY, E. A., and FENTON, E. L., some new observations on diphtheria toxin and antitoxin, 246
——— ——— the action of proteolytic enzymes on the antitoxins and proteins in immune sera. III. Further studies on enzyme systems which split the antitoxin molecule, 314

RACE, R. R., SANGER, RUTH, and SELWYN, J. G., a possible deletion in a human Rh chromosome: a serological and genetical study, 124

ROUNTREE, PHYLLIS M., a complement-fixing antigen of *Bact. coli* bacteriophage T5: its behaviour during virus growth, 341

ST. GROTH, S. FAZEKAS DE, and GOTTSCHALK, A., ovomucin: a substrate for the enzyme of influenza virus. II. Demonstration of its inhomogeneity, 21

SAMARTH, KUMUD D., see *Talageri, V. R.*

SANDERS, A. G., FLOREY, H. W., and WELLS, A. Q., the behaviour of intravenously injected particles of carbon and micrococcin in normal and tuberculous tissue, 452

——— see *Markham, N. P.*

SANGER, RUTH, see *Race, R. R.*

SAPEIKA, N., see *Selzer, G.*

SELWYN, J. G., see *Race, R. R.*

SELZER, G., PARKER, R. G. F., and SAPEIKA, N., an experimental study of senecio poisoning in rats, 14

———, PARKER, R. G. F., MCKENZIE, D., and LINDER, G. C., the comparative effect of alpha-tocopherol and its analogues on massive hepatic necrosis in rats on a protein deficient diet, 493

SIMS, F. H., methionine and choline deficiency in the rat with special reference to the pregnant state, 481

SMITH, J. D., and STOKER, M. G. P., the nucleic acids of *Rickettsia burneti*, 433

SMITH, WILSON, WESTWOOD, M. A., WESTWOOD, J. C. N., and BELYAVIN, G., spontaneous mutation of influenza virus A during routine egg passage, 422

SOLTYS, M. A., see *Dafaalla, E. N.*

STEVENS, MURIEL F., see *Pope, C. G.*

STOKER, M. G. P., see *Smith, J. D.*

STONE, JOYCE D., adsorptive and enzymic behaviour of influenza virus during the O–D change, 367

STONER, H. B., and GREEN, H. N., bodily reactions to trauma. Further studies on the effect of ischaemia on the clotting factor of muscle, 183

SYMINGTON, T., the reaction of the adrenal cortex to adrenaline stress and identification of endogenous liberated sugar-active corticoid by a histological bioassay technique, 58

TALAGERI, V. R., SAMARTH, KUMUD D., BAXI, A. J., and VENKATARAMAN, P. R., alkaline phosphatase levels in plasma and liver following carbon tetrachloride administration, 118.

TOMLINSON, A. H., see *Cook, G. T.*

VENKATARAMAN, P. R., see *Talageri, V. R.*

WALKER, A., see *Crowe, M. O'L.*

WALKER, J. W., and MAYER-GROSS, W., a study on the hyperglycaemic factor in the urine of psychotics, 51

WATKINS, WINIFRED M., see *Morgan, W. T. J.*

WELLS, A. Q., see *Markham, N. P.*

——— see *Sanders, A. G.*

WESTWOOD, J. C. N., see *Smith, Wilson.*

WESTWOOD, M. A., see *Smith, Wilson.*

WILLIAMS, J. R. B., the fibrinolytic activity of urine, 530

WOLL, E., and OLESON, J. J., the effects of a folic acid antagonist (aminopterin) on albino rats: a study in the pathogenesis of sprue, 458

WRIGHT, E. A., MORGAN, R. S., and WRIGHT, G. PAYLING, the movements of toxin in the nervous system in experimental tetanus in rabbits, 169

WRIGHT, G. PAYLING, see *Wright, E. A.*

YATES, MARGARET, see *Bacon, G. A.*
